

PRECIOUS METAL- BEARING CATALYST RECYCLING EXPERTISE

REFINING • PRECIOUS METALS • RECYCLING

We recover and refine precious metals from hydrocarbon and petroleum processing catalysts. Also, our proprietary Pyro-Re® process offers the only pyro-metallurgical recovery of rhenium in the industry. With it, we recover total rhenium content from spent semi-regenerative and cyclic fixed-bed hydrocarbon processing catalysts—and get you a full return. With best-in-class techniques and over seven decades of experience, we deliver the highest possible metal returns for our customers.
