

MERICHEM

Spent Caustic Management Solutions

Sweet Solutions.®

MERICHEM COMPANY

Don't Let Your Spent Caustics Go to Waste

Beneficial reuse is defined as a non-waste activity in which a material is used as an effective substitute for a commercially available product or as a feedstock for a manufacturing process. Merichem is a global leader in beneficial reuse solutions for spent caustics.

Beneficial Reuse provisions:

- Recognized as non-waste by the EPA [40 CFR 261.2 (e) (1) (ii)]
- Basel Convention states that “disposal” does not include direct reuse or alternative uses of such material

Merichem works diligently to stay abreast of changing regulations to ensure compliance in spent caustic and secondary material use. It is our goal to help customers meet waste minimization goals and eliminate labor intensive waste handling protocols.

BENEFICIAL REUSE

SPENT CAUSTIC • NON-WASTE • MERICHEM

Invested in Solutions

Merichem knows that in the ever-changing world of spent caustics investments must be made to provide our customers with the very best service in the industry. We meet the needs of our customers by offering ample storage and a best-in-class transportation fleet.

We see investments such as floating roof tanks for hydrocarbon management and barge vapor recovery systems for emissions management not only as investments in EHS&S and infrastructure, but as an investment in sustainability for the long-term care of our customers.

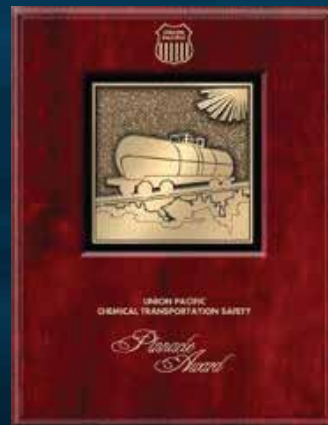

Terminals • Barges • Railcars • Trucks • Vessels • ISO Containers

Committed to Excellence

Merichem is committed to providing excellent service by holding itself to the highest standards to meet the needs of our customers, including a 24/7 customer care line.

Our strong commitment to Responsible Care® has achieved industry recognition through safety awards such as the Union Pacific Chemical Transportation Safety Pinnacle Award.

The John T. Files Technical Center, home of Merichem's Research & Development team, provides high quality analysis to find the proper end use for secondary materials and technical expertise to solve customer challenges.

RESPONSIBLE CARE®
OUR COMMITMENT TO SUSTAINABILITY

Our People Make the Difference You Can Trust
